**DETAILED ACTION**

***Quayle Action***

This application is in condition for allowance except for the following formal matters:

***Declaration -- Date of Execution Omitted***

The examiner notes that the date of execution on the declaration for both inventors has been omitted. Although the Office no longer checks the date of execution, applicant is reminded of the continuing duty of disclosure under 37 CFR 1.56. See MPEP § 602.05.

***Prior Art Cited in Specification***

Applicant must provide copies of the TW and CN patents described on Pages 1-3 of the specification since those references are currently unavailable for the examiner's review.

***Disclosure Objections***

The disclosure is objected to because of the following informalities:

All occurrences of the term "quartz" are misspelled and must be changed to the correct spelling. See Page 2, line 10, etc. Appropriate correction is required.

***Claim Objections***

Claims 1-3 are objected to because of the following informalities:

Claim 1: The colons in lines 7, 11, and 14 must each be changed to semicolons respectively for proper format.

Claim 2: In line 3, "is made of concocted" must be changed to "comprises." In line 4, "plasma and" must be changed to "material" and "an" must be changed to "a."

Claim 3: In line 1, a space must be inserted between "3." and "The."

The foregoing changes are needed for clarity and brevity. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Other Pertinent Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should (1) separately consider the art, and (2) consider the art together with the previously cited prior art for potential applicability under 35 U.S.C. §§ 102 or 103 when responding to this action. US Pats. 950, 889, 308, 895, 788, and 682 and GB 903 disclose convection space heaters relevant to the instant invention.
